

CVR 200

Introducing the CVR and CVRG range, featuring a robust 200mm ram, designed to meet various industrial needs with efficiency and reliability.

CVR 200

OUR PUMPS

CVR (Compact Vertical Ram Pumps):

- ✓ **Small but Mighty:** The CVR is our smallest ram pump, perfect for projects where high pressures aren't required.
- ✓ **Versatile Application:** Ideal for handling less abrasive materials while maintaining excellent performance.

CVRG:

- ✓ **Built for Tough Tasks:** The CVRG is engineered to process more abrasive materials, such as grit and small stones.
- ✓ **Specialised Use:** Primarily used for transferring sludge to and from primary settlement tanks and de-sludging operations.

Features & Benefits:

- ✓ **High Flow Rate:** Maximum flow rate of up to 140 litres per minute.
- ✓ **Pressure Capacity:** Capable of reaching pressures up to 4 bar.
- ✓ **Efficient Sludge Suction:** Handles sludge with up to 10% dry solids.
- ✓ **Energy Efficiency:** Designed for optimal energy use and easy monitoring.
- ✓ **Slow Speed Operation:** Ensures longevity and reduces wear and tear.
